

# THE BLOCKS™

## Radio Translucent Pre-Wired Electrodes

### Radiolucent:

Radiolucent electrode wires provide better visulation for x-ray

### Improved Flexibility:

Softer lead wire improves flexibility with additional length

### Better Fit:

Molded tapered connector for better fit into patient cable

### Better Signal:

Center lead wire allows additional strength and provides a better ECG signal

### Superior Hydrogel:

Provides excellent attachment with no residue when removed or repositioned

### Available in 3 Sizes:

Preemie (7/8 x 7/8) – Order # PC1-6C – (1 Bx 100ct)

Newborn (7/8 x 1-1/4) – Order # PC2-6C – (1 Bx 100ct)

Pediatric (1-1/4 x 1-1/4) – Order # PC3-6C – (1 Bx 100ct)
